

Dindi Bulk Buy Solar: Almost Here

Murrindindi Shire Council is set to launch the Dindi Bulk Buy Program at the Yea Shire Hall on Saturday 16 June at 10am.

The Dindi Bulk Buy Program is a partnership between Council and the Yarra Energy Foundation which aims to give locals **access to advice about solar energy and discounted solar products and systems.**

Murrindindi Shire Council's Natural Environment and Climate Change Portfolio Councillor Rebecca Bowles said Council had been hard at work developing this Program for some time and was really excited about its rollout over coming weeks and delivery over the next 12 months.

"Council has a strong focus on supporting and strengthening environmental sustainability in our communities. We feel that improving the uptake of solar photovoltaic (PV) panels is a great way to do that as they provide a renewable source of energy. And, that's not to mention the benefits people get from helping to keep electricity costs down.

"There will be community information seminars after the launch to provide details on how the quotation, sales and installations process will work, as well as the products and warranties available under the Dindi Bulk Buy Program.

Further details on this exciting program will be released shortly. In the meantime, if you have any questions please contact Council's Coordinator Environment Zoe Blakeney on 5772 0375 or via email at zblakeney@murrindindi.vic.gov.au
