INTRODUCTION

This Register of Public Roads has been prepared in accordance with the Road Management Act 2004 and is to be read in conjunction with Council's Road Management Plan. It is subject to regular review based on the most up-to-date information about the municipal road network maintained by the Murrindindi Shire Council as the Responsible Road Authority.

CRITERIA FOR DETERMINING PUBLIC ROADS

The process used to determine which roads are "reasonably required for general public use", and hence which roads are included in Council's Register of Public Roads, is as follows:

- 1. Any road or road segment which, according to the best available information, has been regularly maintained by the Shire in the past, regardless of the construction standard, has been included in the register of public roads.
- 2. The fact that a road provides access to a house (or houses) does not automatically make it "reasonably required for general public use". Hence, if a road has not been regularly maintained by the Shire in the past, even if it provides access to houses, does not automatically qualify as a "public road".
- 3. Roads constructed to meet Council standards, usually as a condition on a planning permit, would in almost all cases, be added to the register of public roads. Exceptions would be where the upgrade standard was explicitly stated in the relevant documentation (eg planning permit) that the particular road was not an asset that would be maintained by Council in the future.
- 4. Roads with gates or cattle grids on them, which have stock wandering unsupervised on the roads, generally have not been classified as public roads.

There are however, a number of exceptions where, despite the presence of a gate or grid, roads have been regularly maintained by the Shire in the past. It is proposed to formulate a position or proposed policy in relation to this matter for Council consideration in due course.

5. Roads identified as Fire Tracks, mostly which are specified in the Municipal Fire Prevention Strategy, have generally not been included as public roads.

Council have not in the past provided anything more than basic fire-fighting vehicle access on these tracks, usually in consultation with the CFA. It is not proposed to raise the standard of maintenance and/or respond to requests for any maintenance other than necessary fire fighting access. It is proposed to continue to inspect these roads as required and to continue to provide suitable fire access.

6. Under the various criteria outlined above, there will always be cases of unusual or contentious circumstances. It is intended to assess these on a case-by-case basis and, where it is deemed necessary, refer them to Council for a decision.

ADDITIONAL INFORMATION

The Register of Public Roads also includes a list of footpaths for which Council is responsible.

In addition to Council's Register of Public Roads this document also provides for information purposes only:

- a list of "Declared Roads" for which VicRoads is the Coordinating Road Authority, and
- details of "Other Non Public Roads" (including fire tracks) within the municipality.

Comments
Updated Start from 00 Ghin Ghin Rd to RA 181
Shire confirmed to have a history of "occasional maintenance" but never regular maintenance.
Access to properties. Added Feb 2010. Updated 'Public Road' to 'Non Public Road' based on Assetic Oct 2020
Road segment required for property rating purposes. Existing track upgraded as part of bushfire recovery work. May be added to road register in future.
Segment added to provide continuous chainage to property access from N section
Reduced length from 1005 to 978 to remove from licensed area 01/10/2020
