

Unacceptable Wastes

Non-recyclable material exceeding 3m³:

Loads of non-recyclable materials exceeding 3m³ (general household waste, building waste etc) will need to be disposed direct to landfill. The Alexandra landfill will accept waste by appointment only. Appointments can be made by contacting Murrindindi Shire Council's waste department on (03) 5772 0333.

Asbestos:

The use of asbestos is banned nationally. While Resource Recovery Centres do not accept asbestos, Alexandra landfill will accept small quantities of asbestos from domestic sources only. Asbestos can be disposed by making an appointment at the landfill by contacting Murrindindi Shire Council's waste department on (03) 5772 0333. Asbestos must be thoroughly sealed in double wrapped plastic. If the asbestos is not sealed correctly the landfill operator reserves the right to reject the waste.

However Council recommends that asbestos only be handled or removed by certified licensed asbestos removalists. A list of Victorian certified asbestos removalists is provided below.

Chemicals and solvents:

Chemicals and solvents are not accepted at RRCs, and it is important that these are **NOT** placed in your household garbage bin. These items present issues with hazardous materials entering landfill, which can expose landfill operators to hazardous or toxic chemicals, and cause severe damage to the environment.

ChemClear is an agricultural and veterinary (agvet) chemical collection service which can be utilised to collect any agvet chemicals which are no longer needed. ChemClear run local collection services, however your chemicals must be registered. This can be done by visiting www.chemclear.com.au or calling 1800 008 182. ChemClear have also established a permanent collection facility in Laverton North. For more information about collection points and accepted chemicals visit the Chemclear website.

'**Detox your Home**' operates a free of charge collection service of unwanted household chemicals. For mobile collection points there is no need to register outside of metropolitan councils. Unfortunately, there are currently no scheduled collection points within the Murrindindi Shire Council. For more information and details on collection points visit: <http://www.sustainability.vic.gov.au/services-and-advice/households/waste-and-recycling/detox-your-home>.

Syringes:

Syringes and other sharps are not accepted at Resource Recovery Centres, and should not be placed in your household waste bin. Council offers a free disposal service for used hypodermic needles and syringes. Contact a council office to obtain a sharp safe container. Once the container has been filled it can be returned and swapped for another. This service is not available to commercial operators. For further information contact council's environmental health department on (03) 5772 0377.

Paint:

Paint is not accepted at RRCs within the Shire, however there permanent drop off facilities available outside of the shire:

- Coldstream Transfer Station: 200 Leonard Road, Lilydale
- Shepparton Transfer Station: Wanganui Road, Shepparton
